I am a web developer with a passion for web development and all things programming related. I used to be a professional accountant, but had to make a career change away from the most soulless job on the planet. I've taught myself foundational web development and software development skills using Javascript, CSS, HTML, Python, Node, NoSql, SQL and more. I have completed numerous mobile first, responsive projects with a server and client side using APIs, authentication, OOP and more. I built these projects entirely: from wireframing the project to finally hosting the web applications.

EXPERIENCE

Studying web development - full time

February 2020 - PRESENT

- Udemy courses on Javascript and web development.
